

1. What is the difference between Bar and Column charts?

1 / 1 point

- ☐ The length of the bars
- ☐ The width of the bars
- ☒ One uses vertical bars, and one uses horizontal bars
- ☐ The number of bars

✓ **Correct**

This is the difference between bar and column charts.

2. Which chart uses nested rectangles?

1 / 1 point

- ☒ Treemaps
- ☐ Sparklines
- ☐ Bubble charts
- ☐ Scatter charts

✓ **Correct**

Treemaps use nested rectangles.

3. Which two charts typically have categories arranged on the horizontal axis and values on the vertical axis?

1 / 1 point

- ☒ Column and line charts
- ☐ Column and pie charts
- ☐ Pie and bar charts
- ☐ Pie and line charts

✓ **Correct**

Both of these chart types typically have categories arranged on the horizontal axis and values on the vertical axis.

4. When you add a filter to a pivot chart, how do you update the data in the original source pivot table?

1 / 1 point

- ☒ You do not need to do anything, as changes are immediately reflected in the pivot table data too
- ☐ You need to refresh the pivot table worksheet to refresh the data
- ☐ You need to manually add the filter to the pivot table in the PivotTable Fields pane
- ☐ You need to click Refresh All in the Data group of the Analyze tab for the pivot table

☒ **Correct**

When you add a filter to a pivot chart, changes are immediately reflected in the original source pivot table.
